

Master of Business Information Systems student at Monash University with experience in data analysis, dashboard development, and data-driven decision-making. Skilled in Python, SQL, and data visualisation tools, with hands-on experience analysing large datasets and delivering actionable insights. Seeking opportunities in Business and Data Analytics to apply analytical and problem-solving skills in real-world environments.

EDUCATION

Monash University (2025-2026) <i>Masters of Business Information Systems</i>	Melbourne, VIC
Fr. Conceicao Rodrigues College of Engineering (2020-2024) <i>Bachelors of Engineering: Electronics and Computer Science</i> CGPA: 8.76	Mumbai, India
Sandip Global School and Junior College (2018-2020) <i>HSC Class 12th</i> Aggregate: 72.77%	Nashik, India

SKILLS

Programming: Java, C++, Python, JavaScript, C, R

Markup Languages: HTML, CSS

Frameworks: React JS, Express JS, EJS, Node JS, D3.js

Databases: MySQL, MongoDB, PostgreSQL

Tools : Power BI, Tableau, Figma, Ms Excel

Data Analysis: Pandas, NumPy, Exploratory Data Analysis (EDA), Data Cleaning, Data Transformation

Business & Analytical Skills: Problem Solving, Stakeholder Communication, Requirement Analysis, KPI Analysis, Data-Driven Decision Making

PROFESSIONAL EXPERIENCE

Monash University, Postgraduate IT Peer Mentor , March 2026 – Present	Melbourne, VIC, Australia
- Mentored undergraduate and postgraduate students on IT concepts, academic challenges, and university systems, improving student engagement and learning outcomes. - Conducted one-on-one and group mentoring sessions to support problem-solving, assignments, and coursework challenges. - Provided guidance on digital tools and learning platforms to enhance student productivity and engagement.	
NullClass, Data Analyst , November 2024 – January 2025	Remote
- Utilized Python (pandas, NumPy) to perform data cleaning, transformation, and preprocessing on large datasets to ensure data quality and consistency. - Developed interactive dashboards and visualizations in Tableau to identify key trends and insights. - Gained hands-on experience with data pipelines, ETL processes, and visual storytelling techniques.	
Team Vaayushastra, GUI Team Member , June 2021 – May 2022	Mumbai, India
- Developed the team website for Team Vaayushastra. - Engineered a user-friendly GUI for an RC plane utilizing PyQt5 in Python. - Developed advanced visualization tools to analyse and enhance plane performance. - Contributed to the creation of an autonomous control system, implementing OpenCV for automated landing.	
Spark Foundation, Web Development Intern , July 2022 – August 2022	Remote
- Developed an engaging basic banking system using PHP. - Implemented enhanced security with OTP verification via email.	

- Utilized MySQL for a robust and efficient database structure.

PROJECTS

IPL Match Dynamics Dashboard

- Analysed 278K+ deliveries & 1,100+ matches to identify trends in toss decisions, scoring phases, and venue performance.
- Built an interactive D3.js dashboard with dynamic filters enabling real-time exploratory analysis.
- Identified that toss advantage is venue-dependent, enabling more effective strategic planning.
- Provided insights on phase-wise performance contributing to winning outcomes.

Hateful Meme Detection

- Utilized a Detectron2 model for accurate facial recognition and detection of various entities within the memes.
- Constructed a knowledge graph on a small scale and leveraged it for inferencing purposes,
- Implemented a BERT model for classification tasks, achieving a commendable accuracy of 72 %.

Blockchain based Movie Distribution System

- Ethereum based movie distribution system and integrated Third web for deployment.
- Friendly UI based on react along with mail otp verification system.
- Implemented IPFS for secure media file storage.

Netflix IT Strategy & AI Analysis (Case Study)

- Evaluated Netflix's business-IT alignment using SWOT, Value Chain, and Strategic Alignment Model, identifying how AI drives competitive advantage
- Analysed impact of AI-powered personalization, cloud architecture, and microservices on scalability, user engagement, and operational efficiency
- Identified critical risks (data privacy, algorithmic bias) and recommended ethical AI governance and data-driven strategy improvements.

CERTIFICATIONS

- The Business Intelligence Analyst Course 2023 -**Udemy**
- The Data Science Course: Complete Data Science Bootcamp 2024 – **Udemy**
- The Complete 2023 Web Development Bootcamp -**Udemy**
- The Complete Python Bootcamp From Zero to Hero in Python – **Udemy**

ACHIEVEMENTS

- My Team(Team Vaayushashtra) participated in SAE Aero design west 2022 competition and secured 5th rank worldwide.
- Participated in the Kavach India Hackathon, Smart India Hackathon and Qualified for the nomination to the national level.
- Participated in the Bit N Build Hackathon and conducted by Google Developer Student Club and qualified for intercollege round.

EXTRACURRICULAR AND COMMUNITY SERVICES

- Attended webinar 'Deployment of Teams for Cooperating Aerial Vehicles in Real World Environment' on Thursday 9th March 2023.
- Attended Workshop 'Mindful stress management for Work-life Harmony.
- Participated in Beach Clean up on 09/10/2022 conducted by Change in us and its collaborators.
- Participated in 'Heat N Sole' Marathon which was conducted by Rotaract Club CRCE to support NGOs.
